***To Applicant:***

Thank you for taking the time to provide us with the information requested on this application. Lawn irrigation systems must be underground and totally closed with no faucets or sillcocks which could be in any way connected or re-connected to the property's domestic water line. The City's construction standards for installation of the meter setter and backflow prevention devices must be followed. Consumption measured from this meter will be billed for water only. Customers requesting any change to the information contained in their domestic service, such as change of ownership, mailing address, etc. must include the irrigation account as well. Any landlord/tenant terms that may apply to the domestic service apply to the irrigation service as well. Regardless, under all circumstances the property owner remains responsible for the payment of any and all municipal utility charges for the property. Until this completed application is returned to the Utility, no approval for meter installations will be granted. For your information, a summary of rules, rates and fees is available upon request or on the website at [www.concordnh.gov/utilitybilling](http://www.concordnh.gov/utilitybilling). If you have any questions please contact a customer service representative.
