

## **CIP # 83 Alder Creek Culvert Replacement Project:**

### Update 11-4-2021:

Weaver Brother Construction Inc. has completed the installation of the new culvert. The road was paved last Friday. Next week the contractor will be cleaning up the site and installing loam and seed for bank and yard winter stabilization. The road is expected to reopen to all traffic toward the end of the week, weather pending. Thank you to all of the abutting residents for your continued support throughout the project.

### Update 10-14-2021:

Early next week Weaver Brothers Construction Inc. will set up the sanitary sewer bypass which will have no impact on the residents. Mid week we will begin to set the new culvert. Residents may notice the culvert sections being delivered to the site on large flat bed trucks via Abbott Road. The week will end with tying in the new water main. Minor disruptions to services should be anticipated.

### Update 10-06-2021:

Weaver Brothers Construction will be removing the existing Alder Creek Drive road culvert and spend most of next week on earthwork in preparation for installing the new 8' W x 16' H x 70' L concrete box culvert. Residents will notice an increase in truck traffic next week to import fill material for this work.

### Update 9-23-2021:

Weaver Brothers Construction will close Alder Creek Drive between Clover Court and Woodbine Avenue beginning Monday October 4, 2021 at 7:00 AM in preparation for the culvert replacement. This closure will last through mid-November and there will be no through traffic, pedestrians and Emergency Vehicles will not be able to pass. All residents in the development were notified by the City of this project closure earlier this month.
